

INTERNET SECURITY AWARENESS COURSE

Your employees are your company's most important and effective security measure. As Internet-connected organizations continue to upgrade their technical security measures, hackers are shifting to attacks that target the organization's soft spot—*employees*. Phishing, social engineering, and Trojan horse attacks are all on the rise—Why? Because they work.

Whether you've just suffered a computer security incident or want to prevent one, the Futures "Internet Security Awareness Course: Through the Eyes of a Hacker" will teach your employees:

- What hackers want
- How to recognize attacks
- What to do to protect your business

Who should attend this course? This informative course is well-suited for companies that must meet annual training requirements for HIPAA, SOX, AND GLB. This course is provided **onsite** to keep costs at a minimum for you, and a training certificate will be provided to those who complete this half day course.

Why use Futures over its competitors or even your own staff? Futures Inc is a small company that specializes in network security. Why waste valuable staff hours developing and maintaining security training when Futures has world-class training ready on the shelf? Our instructors have a variety of backgrounds including ethical hacking, system engineering, software development, and analysis of the latest techniques hackers are using to break-in to organizations like yours. We're trusted by both government organizations and Fortune 100 companies—allow us to assist you with your network security needs.

Your employees are your best defense against hackers, but do they know what to do? If you hesitate to answer this question, please contact us today. Let the Futures team help secure your company by training your staff through the eyes of a hacker.
